

Eyebombing

There's some cheeky little creatures out there!

Ask if you can borrow a camera or phone camera for half an hour and you might be able to find some cheeky little creatures around your house!

All you need is a pair of googly eyes and a bit of blu tack or glue stick and you will be

surprised how many funny faces will be hidden around your home! If you have a printer at home you could create a presentation page or simply email them to your friends and family to **put a smile on someones face!**

If you don't have any plastic googly eyes then simply cut out some small paper circles and draw eyes on them!!

Humanize inanimate objects and make us smile!
